WHAT YOUR SYSTEM INCLUDES

IOT TECHS · Every feature listed below is standard in all of our installed systems

CAMERA

4K Ultra HD Resolution

Every camera records at 8 megapixels — 4K clarity. See faces, license plates, and fine details day or night. No grainy footage, no guessing.

CAMERA

Full-Color Night Vision

Advanced color night vision captures vivid, full-color video even in near-total darkness — unlike traditional infrared cameras that produce black-and-white footage.

CAMERA

AI Human Detection

Smart on-camera AI distinguishes between people, vehicles, and general motion. Get alerts that matter — not every leaf or shadow. Dramatically reduces false alarms.

INSTALL

Expert Technician Installation

Installed by technicians with 5–10+ years of experience. Every cable properly run, terminated, and tested. Professional mounting and full waterproofing on every outdoor camera.

RECORDING

24/7 Continuous Recording

Your system records around the clock — no gaps, no motion-only clips. Every second is captured and stored locally on your dedicated hard drive. No cloud required.

RECORDING

No Wi-Fi Required

Cameras connect directly to the NVR via PoE (Power over Ethernet). Fully offline — no internet dependency, no dead zones, no dropped connections.

RECORDING

No Monthly Subscriptions

Everything runs locally on your hardware. No cloud fees, no recurring charges. You own the system outright — pay once, record forever.

SUPPORT

Remote Technical Support

Our team can access your system remotely to diagnose issues, adjust settings, and resolve problems — no on-site visit needed. Screen sharing and remote control available.

BNC vs CAT6

ANALOG (1940s TECH) vs DIGITAL (2002+ TECH) · KNOW THE DIFFERENCE BEFORE YOU DECIDE

BNC (COAXIAL)

FOR CCTV

BNC (Bayonet Neill–Concelman) connectors are used with coaxial cables to transmit analog video signals in traditional CCTV systems.

 **INVENTED:**
1940s–1950s
Originally developed by Bell Labs for military and radio applications.

Signal Type

Outdated analog signal

Image Quality

Prone to blur & ghosting

Signal Over Distance

Degrades over long runs

Cabling

2 cables required (video + power)

Connections

More failure points

Lifespan

~3–5 years

CAT6 (ETHERNET)

FOR CCTV (IP SYSTEMS)

Cat6 Ethernet cable is used to transmit high-speed data and power (PoE) to IP cameras in modern CCTV systems.

 **INVENTED:**
2002
Officially standardized by TIA/EIA in 2002 (TIA/EIA-568-B.2)

Signal Type

Modern digital system

Image Quality

Crystal-clear — no blur, no ghosting

Signal Over Distance

No signal loss or interference

Cabling

1 cable — power + video via PoE

Connections

Strong, reliable connections

Lifespan

10–15+ years

COST DIFFERENCE: The price difference between BNC and CAT6 is marginal. For long-term reliability, CAT6 is always worth it.

WHAT ACTUALLY MATTERS: BNC quality drops over time · CAT6 stays sharp and reliable for decades

BOTTOM LINE: BNC is outdated analog. **CAT6 is modern digital — clearer, stronger, built to last.**

We offer both — but we always recommend CAT6 for new installations. The cost difference is minimal; the quality difference is not.

PERFORMANCE CREDIT PROGRAM (PCP)

IOT TECHS · March 30, 2026 · Save up to 10% based on site conditions & scheduling flexibility

WHAT IS THE PERFORMANCE CREDIT PROGRAM?

The PCP is a job-condition credit applied to your project subtotal — a reward for sites that allow for efficient, streamlined installation. It keeps our base pricing protected on harder jobs while letting us pass savings directly to clients whose sites make the work faster and cleaner.

PCP credits are shown as a transparent line-item deduction — never baked into pricing. You see exactly what you're saving and why. Credits range from 5% to 10% of the project subtotal.

QUALIFIES FOR PCP CREDIT

- ✓ **Clean site access**
Open ceilings, exposed beams, easy pathways
- ✓ **Existing conduit**
Cable routes already in place or partially run
- ✓ **Minimal obstacles**
No heavy drilling, no confined or tight runs
- ✓ **Flexible scheduling**
Timeline accommodates our crew availability
- ✓ **Quick-access areas**
No special permits or restricted zone entry
- ✓ **Cooperative conditions**
Client on-site, decisions made in advance

CREDIT TIERS

5% Credit 1–2 qualifying conditions met	STANDARD
7.5% Credit 3–4 qualifying conditions met	ENHANCED
10% Credit 5–6 qualifying conditions met	MAXIMUM

EXAMPLE — 8-CAMERA PROFESSIONAL PACKAGE

Package Subtotal	\$2,510.00
PCP Credit — 10%	–\$251.00
TOTAL DUE AFTER CREDIT	\$2,259.00

PCP credits are applied at IOT TECHS' discretion based on site assessment. Credits are not guaranteed and may be adjusted or removed if site conditions differ from initial evaluation. Credits apply to labor subtotal only and are shown as a transparent line-item deduction on all proposals.

RECORDING STORAGE ESTIMATE SHEET

IOT TECHS · March 30, 2026 · Retention ranges based on resolution, motion activity, and recording mode

IMPORTANT NOTE:

All storage estimates are shown as safe ranges (lowest to highest). Actual playback time depends heavily on motion activity, resolution, and scene changes. Cameras in high-traffic areas (streets, entrances, registers) will use storage faster. Always plan using the LOWEST number in the range for accuracy.

★ SWEET SPOT RECOMMENDATION: 1TB PER CAMERA

Typically gives ~25–30 days per camera · Always plan to the lower end (25 days) for accuracy · More motion = less storage time
Key takeaways: Hybrid setups can extend storage · Heavy motion can still reduce it · 1TB/cam is the proven install standard

24/7 CONTINUOUS RECORDING RETENTION

All cameras recording full time

CAMERAS	4TB	6TB	8TB	12TB	16TB
4 cams	25–28 days ★ SWEET SPOT	37–42 days	50–56 days	75–84 days	100–112 days
6 cams	16–18 days	25–28 days ★ SWEET SPOT	33–37 days	50–56 days	66–74 days
8 cams	12–14 days	18–21 days	25–28 days ★ SWEET SPOT	37–42 days	50–56 days
10 cams	10–11 days	15–16 days	20–22 days	30–33 days ★ SWEET SPOT	40–44 days
12 cams	8–9 days	12–14 days	16–18 days	25–28 days ★ SWEET SPOT	33–37 days
14 cams	7–8 days	10–12 days	14–16 days	21–24 days	28–32 days ★ SWEET SPOT
16 cams	6–7 days	9–10 days	12–14 days	18–21 days	25–28 days ★ SWEET SPOT

HYBRID RECORDING RETENTION

Half 24/7 + half motion / reduced-hour recording

CAMERAS	4TB	6TB	8TB	12TB	16TB
4 cams	33–37 days ★ SWEET SPOT	50–56 days	66–74 days	100–112 days	133–149 days
6 cams	22–24 days	33–37 days ★ SWEET SPOT	44–49 days	66–74 days	88–99 days
8 cams	16–18 days	25–28 days	33–37 days ★ SWEET SPOT	50–56 days	66–74 days
10 cams	13–14 days	20–22 days	26–29 days	40–44 days ★ SWEET SPOT	53–59 days
12 cams	11–12 days	16–18 days	22–24 days	33–37 days ★ SWEET SPOT	44–49 days
14 cams	9–10 days	14–16 days	18–21 days	28–32 days	37–42 days ★ SWEET SPOT
16 cams	8–9 days	12–14 days	16–18 days	25–28 days	33–37 days ★ SWEET SPOT

KEY TAKEAWAYS: Sweet spot = 1TB/cam · Plan to the lowest range · More motion = faster storage use · Hybrid can extend retention

WARRANTY & PURCHASE PROTECTION POLICY

Limited System Warranty · Purchase Protection · Service Terms · Customer Rights

1. LIMITED SYSTEM WARRANTY

IOT TECHS provides a limited warranty covering qualifying equipment, workmanship, and installation services performed directly by IOT TECHS. Warranty coverage begins on the original installation completion date unless otherwise stated in writing.

- CCTV Cameras Supplied by IOT TECHS — 1 Year Limited Warranty
- NVR/DVR Recording Systems — 1 Year Limited Warranty
- PoE Switches & Power Supplies Provided by IOT TECHS — 1 Year Limited Warranty
- Cat6 Cabling Installed by IOT TECHS — Up to 10 Year Limited Installation Warranty
- Labor & Installation — 90 Day Limited Labor Warranty
- Hard Drives — Covered under manufacturer warranty unless otherwise stated

Extended warranties may be offered separately in writing.

2. PURCHASE PROTECTION GUARANTEE

If the installed system does not reasonably meet the written coverage expectations or agreed scope of work, IOT TECHS may, at its sole discretion, offer one or more of the following remedies:

- Reposition cameras
- Adjust lenses or angles
- Reconfigure recording settings
- Replace defective components
- Repair installation-related issues
- Provide alternative solutions
- Offer partial store credit or resolution options

Customer agrees to allow IOT TECHS reasonable opportunity to inspect, diagnose, and resolve issues before requesting refunds, disputes, or chargebacks.

3. ISSUE REPORTING REQUIREMENT

All issues, defects, concerns, or warranty claims must be reported to IOT TECHS within fourteen (14) calendar days from the date the issue was first discovered. Failure to report within this timeframe may delay warranty processing, limit available remedies, or void certain warranty claims if continued operation caused additional damage. Customers are encouraged to report issues immediately upon discovery.

4. WHAT IS COVERED

The following may qualify for warranty coverage if caused by installation error or hardware failure from equipment supplied by IOT TECHS under normal intended operating conditions:

- Camera hardware failure
- NVR/DVR malfunction
- Defective PoE switch supplied by IOT TECHS
- Failed cable termination
- Video signal loss caused by workmanship
- Recording failures due to defective supplied hardware
- Water intrusion caused directly by improper sealing by IOT TECHS
- Configuration or programming errors
- Failed connectors installed by IOT TECHS
- Improperly crimped or terminated cables
- Installation workmanship defects

5. WHAT IS NOT COVERED

The following are expressly excluded from warranty coverage:

- Customer-supplied equipment
- Internet outages or weak Wi-Fi
- ISP-related issues
- Router or networking issues not supplied by IOT TECHS
- Electrical surges or lightning strikes
- Flooding, storms, fire, vandalism, theft, or acts of God
- Construction or renovation damage
- Damage caused by painters, electricians, contractors, or tenants
- Rodent, insect, or animal damage
- Corrosion from harsh environments
- Cosmetic wear
- Improper customer use
- Physical abuse or impact damage
- Password resets due to customer modifications
- Firmware modifications by third parties
- Failure to maintain electrical power
- Damage caused by generators or unstable voltage
- Mobile app outages from third-party platforms
- Hard drive wear over time
- Loss of recordings or storage overflow
- Software compatibility changes outside IOT TECHS control
- Equipment relocated or modified by others

6. CUSTOMER RESPONSIBILITIES

- Maintain stable electrical power
- Maintain internet service for remote viewing functionality
- Keep equipment protected from moisture and excessive heat
- Promptly report system issues
- Allow reasonable access for service
- Avoid unauthorized modifications or tampering
- Protect exposed wiring from damage
- Reboot systems periodically if instructed

Failure to maintain proper operating conditions may void warranty coverage.

7. SERVICE CALL POLICY

Covered warranty defects will be serviced during normal business hours at no labor charge. For non-warranty service calls, the following minimum fees apply:

Standard Service Call

\$150 plus applicable tolls

Emergency / After-Hours Service

Additional fees apply

Additional charges may apply for parking, congestion pricing, ferry charges, tolls, lifts, special access equipment, or extended troubleshooting. Service call fees are non-refundable once technician dispatch occurs.

8. OUTDOOR CAMERA & WATERPROOFING DISCLAIMER

Outdoor equipment is professionally sealed using weather-resistant methods including dielectric grease, waterproof fittings, and protective sealing materials. However, no outdoor system is guaranteed against extreme weather, flooding, pressure washing, standing water, salt corrosion, physical damage, or environmental deterioration. Outdoor exposure naturally increases equipment wear over time.

9. RECORDING & STORAGE DISCLAIMER

IOT TECHS does not guarantee uninterrupted recording or storage retention. Storage duration varies based on camera resolution, frame rate, bitrate, motion activity, recording mode, and hard drive health. The automatic overwrite feature may erase older footage once storage becomes full. Customer is responsible for reviewing important footage promptly and maintaining backups if desired.

10. AUDIO RECORDING NOTICE

Some systems may support audio recording functionality. Customer is solely responsible for complying with all federal, state, and local audio recording laws. IOT TECHS assumes no liability regarding audio recording legality or consent requirements.

11. REMOTE VIEWING DISCLAIMER

Remote viewing requires active internet service, compatible mobile devices, proper router/network operation, and third-party application availability. IOT TECHS does not guarantee uninterrupted remote access due to ISP outages, app failures, software updates, firewall restrictions, or manufacturer server issues. Local recording may continue even if remote viewing is unavailable.

12. PAYMENT TERMS & CHARGEBACK POLICY

Unless otherwise stated: 50% deposit required before work begins; remaining balance due immediately upon completion. Late balances may result in suspension of warranty coverage, service refusal, collections, and legal action.

Customer agrees not to initiate a credit card dispute or chargeback without first allowing IOT TECHS reasonable opportunity to inspect and resolve the concern. Fraudulent, misleading, or unjustified chargebacks may result in cancellation of warranty, collections action, legal fees, administrative fees, and civil recovery efforts.

IOT TECHS maintains technician logs, GPS timestamps, photographs, videos, communication records, invoices, diagnostic reports, and work documentation. These records may be used to dispute fraudulent claims.

13. INSTALLATION CONDITIONS

Customer agrees to provide safe access to the property, working electrical outlets, proper ladder clearance, and legal authorization for installation. IOT TECHS reserves the right to pause or refuse work under unsafe conditions. Additional charges may apply for concealed obstacles, unexpected construction conditions, excessive fishing, concrete or steel drilling, asbestos concerns, or inaccessible areas.

14. WARRANTY VOID CONDITIONS

- Invoice balances remain unpaid
- Equipment is tampered with or serial numbers removed
- Third parties modify the installation
- Customer relocates equipment
- Improper voltage damages equipment
- Water exposure results from customer negligence
- System abuse occurs

15. LIMITATION OF LIABILITY

IOT TECHS shall not be liable for theft, personal injury, property damage, business interruption, lost profits, missed recordings, emotional distress, consequential damages, or criminal activity. Security systems reduce risk but do not guarantee prevention of incidents. Maximum liability shall not exceed the original invoice amount paid to IOT TECHS.

16. TRANSFERABILITY

Warranty is non-transferable unless approved in writing by IOT TECHS.

17. CUSTOMER ACKNOWLEDGEMENT

- They have read and understood this policy
- Security systems are risk-reduction tools only
- No security system guarantees prevention of loss or crime
- Customer must allow reasonable repair opportunities
- Warranty limitations and exclusions are accepted
- Final system placement is approved upon installation completion unless otherwise documented

Thank you for choosing IOT TECHS for your security needs.
